

Charger CH-69JA (Custom product)

OUTLINE

MITSUMI's charger with their abundant variations to cope with diverse environments of equipment world-wide. Many functions such as constant voltage output and switching of charging mode by discrimination of batteries. Improvement of charging rate by enhanced circuitry. Upgraded has been the security by way of complete function of the improvement of circuitry and by the detection of abnormal state. Future chargers with the performance that meets users' requirements. Complete custom production system will continue to allow for the optimal products.

FEATURES

1. Applicable to both Ni-Cd and Li-ion.
2. Automatic changeover of charging system
3. Automatic fault detection

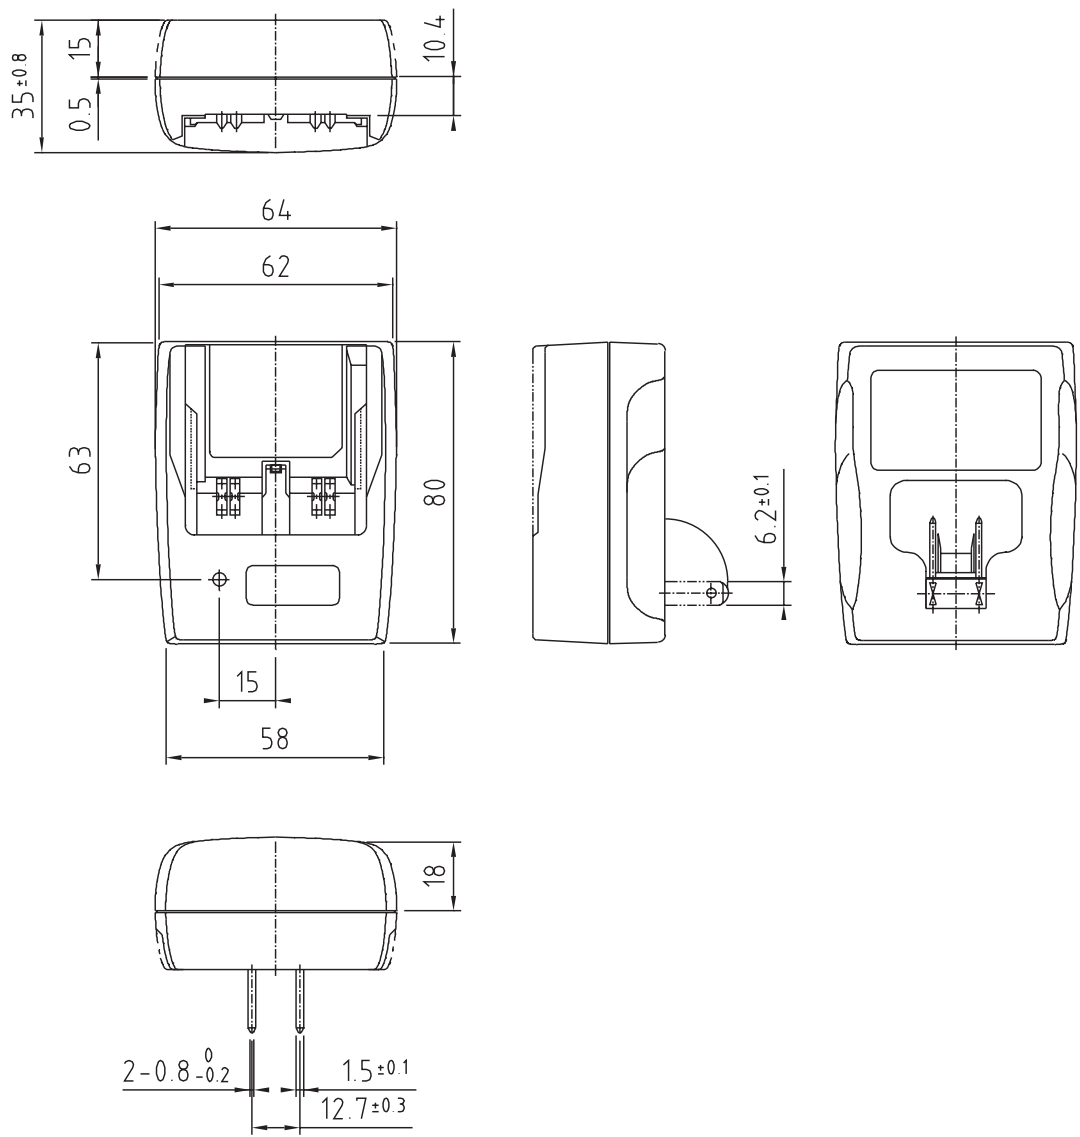

SPECIFICATIONS

1. In compliance with the Electrical Appliance and Material Control Law
2. Constant-current charge (Ni-Cd)
3. Constant-voltage charge (Li-ion)
4. Protection timer function

USE

1. Ordinary charger for mobile phone

DIMENSION

Unit : mm
